

Budgeting...do you really know what you're doing?

The software, training and solutions are right here!

The Romano Consulting Group has developed an easy to use budgeting system built specifically for the flooring industry. It takes the complex art of budget forecasting and makes it simple. We work with you to customize a budgeting solution that provides you the financial data that all business owners need to have at their finger tips.

With just a Click of a Button...

Automated Budget Forecast

Save yourself time and generate an accurate budget forecast based on historical data. Thoughtfully consider the market and your business to modify the forecast to fit your reality.

Variance Data

Easily view how your actual numbers compare to the budget each month as well as year to date. Identify early warning signs and make strategic business decisions before the competition.

Breakeven Analysis

know definitively how much you need to sell each month to pay all of your fixed costs. Push beyond this level and profits increase exponentially.

Benchmark Data

Quickly reference other successful stores similar in size and/or location to yours and gain knowledge about where additional savings and income can be generated.

Training & Support

We will provide training on how to use the software as well as expert recommendations on where you could be leaving the most cash on the table.

Don't waste your time looking through old files, pecking on your calculator and scratching your head. Make the decision that will empower you with the vital information all flooring owners need. You owe it to your employees, your spouse and yourself to start watching every penny that goes in and out your door. Make the best investment you'll make all year today, by signing up to have your very own Customized Budget Model built for you.

Our experience has shown that stores realize at least a two point increase in net income with the use of our budget models. For a \$3,000,000 store that represents a \$60,000 increase in earnings.

My Mom's Advice #1: you cannot change what you do not measure
